Personify Game Night

Installing OpenArena

To install Quake Open Arena:

1. Connect to the TMAR VPN if you are not in the office. (you must stay connected to the VPN in order to be able to install the game, and join the server).
2. Download the OpenArena .zip file attached in the email. Alternatively, it can be downloaded from this location: P:\transfer\rwatson\OpenArena\OpenArena.zip
3. Navigate to your Downloads folder.
4. Unzip the InstallOpenArena.zip file.
5. Double-click the InstallOpenArena.exe file from step 3.
6. When install is complete, double-click the OpenArena Icon on your desktop to play.

Changing your Settings

Change Screen Resolution

From the Main Menu in game:

1. Click Setup -> System -> Graphics
2. From this screen you can set your game's resolution and whether the game runs full screen or not.

Connecting to the Personify GameNight Server

1. Click on Multiplayer
2. At the top of the screen you should see "Servers: Favorites"
 - a. The Game Night server is already added to your favorites.
3. Click on "Fight"
4. When Prompted for a password:

PersonifyGameNight

Troubleshooting

The install file, is not installing...

If you are not in the office be sure you are connected to the TMAR VPN.

The Personify Game Night Server does not appear in my server list

If you don't see the server, make sure to turn "Hide Private" in the server list to "off".

I still don't see the Game Night Server

You can manually connect to the server by choosing "Specify" from the server list, and inputting the following IP address:

172.22.4.163

Leave port as:

27960
